

Introducing the Northstar E

VMI's one-of-a-kind wheelchair-accessible minivan for caregivers

What is the Northstar E?

VMI's Northstar E is the only caregiver-focused wheelchair-accessible minivan to offer front-seat wheelchair access and an in-floor, slide-out ramp. The Northstar E is practical, easy to use, and more affordable than most other wheelchair accessible vans. VMI's Dodge Northstar E has a low cost starting at \$35,800 MSRP, which is comparable to lower-end rear-entry or used wheelchair accessible vehicles.

1 EASY TO USE

2 ELEMENTARY

3 ECONOMICAL

About the Northstar E Ramp

The patent-pending manual in-floor ramp of the Northstar E is easy to stow and deploy and allows ample room for wheelchair maneuverability inside the van. Caregivers of any size or age can use the ramp with little effort and no bending. The in-floor ramp does not block the doorway, which allows passengers to enter and exit safely and conveniently without deploying the ramp.

Seating and Passenger Capacity

By providing optional mid-row seats and a removable front passenger seat, the Northstar E fits up to seven passengers and offers caregivers more flexibility. The caregiver has the option to sit next to the wheelchair user in either the front row or middle row. Your loved ones won't have to feel like cargo!

Dodge Northstar E MSRP
starting as low as

\$35,800

Dodge Northstar E Payments
starting as low as
\$400 / Month*

***On Approved Credit**

Loan Example:

A six-year, fixed-rate loan for a \$35,800 new car with 25% down. Based on a simple interest rate of 2.34%, this loan would have 72 monthly payments of \$400.07. Credit subject to approval. Rates and payment amounts will vary and are subject to change.
