Reliant™

Reliant is the perfect wheelchair lift for the budget-minded consumer who desires a low initial and lifetime maintenance cost. With its mechanical simplicity and time-tested design, this mobility product sets the standard for platform lifts and remains the benchmark in the industry.

- Proven technology that delivers consistently reliable use
- Multiple platform size options provide versatility
- Easy operation and low maintenance cost
- Compact design provides optimal interior space
- Lift capacity ranges from 600 lbs. (272kg) to 800 lbs. (363kg) based on vehicle type

KlearVue™

With a platform that folds on a horizontal axis, the KlearVue wheelchair lift provides an unobstructed view out of the vehicle windows for safer driving. This fully automatic, folding lift design allows for a longer platform length of up to 51" to fit standard door height openings.

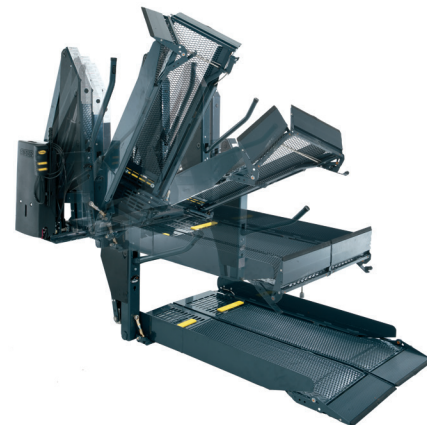

- Unobstructed view through the windows for safe driving
- Multiple platform size options provide versatility
- Enables a longer platform to fit into a standard door height
- Lift capacity ranges from 600 lbs. (272kg) to 800 lbs. (363kg) based on vehicle type

Clearway™

The popular Clearway split platform lift is one of the only lifts in the market that allows able-bodied passengers to enter and exit the vehicle when the lift is in its stowed position. The split design also allows for an unobstructed view through the windows for safer driving.

- Folds out of the way, allowing easy entry and exit when the lift is stowed
- Unobstructed view through the windows for safe driving
- Multiple platform size options provide versatility
- Lift capacity ranges from 600 lbs. (272kg) to 800 lbs. (363kg) based on vehicle type

Slide-Away™

The Slide-Away folding platform lift is one of the only lifts in the market that allows able-bodied passengers to enter and exit the vehicle when the lift is in the stowed position. The folding platform does not limit the motion of the front passenger seat and offers an unobstructed view through the windows for safer driving when retracted. The sliding tower offers the strength of a dual-post unit with single-post flexibility, allowing for ease of entry and exit.

- Enables full-functionality and movement of the front passenger seat
- Unobstructed door allows ease of entry and exit when the lift is stowed
- Clear view out the windows for safe driving
- Strength of a dual-post lift with the passenger and cargo space of a single-post lift
