DOES IT HAVE A POWER CORD On board 50AMP _____ 30AMP ✓

DOES IT HAVE ANY TV'S 1

DOES IT HAVE ANY ACCESSORIES SUCH AS HITCH,
CAMERA, ECT Hitch in caddy

HOW MANY A/C's 1

1. Be sure you have a good power supply and a good battery on it.

2. Open camper up and turn everything electrical on... EVERYTHING

3. Check interior for water

damage soft floor in bedroom spot spot under window
water stain on wall around window

4. Check exterior for water

damage did not find any

5. Try and locate source of any water

damage window need silicone

6. How was slide out

operation? good going out not good coming in. Hesitates

coming back in if you wait 10 seconds it starts
working again. We ordered new motor on getting
wrotts when slide moving in. Rusty thinks motor is
under load.

Note any other damages, parts or failures needed on the exterior _____

CAMPER CHECK INTERIOR

Be sure everything is on that can be on and running before you start this process.

Now is the time to go ahead and fill the fresh tank with water and connect propane

Now is the time to go ahead and fill the holding tanks and check for leaks

Now is the time to light the stove and bleed air from propane lines

Now is the time to turn on your A/C or Furnace depending on the time of year

1. Check for any initial water leaks inside from cabinets, faucets, toilets, under sinks, outdoor kitchen, water heater, and underneath from underbelly.
Check for water leaks everywhere.

If no leaks are found leave water on and turn on water heater Gas side.

If leaks are found please note below and shut water off.

TP None found

2. Connect propane and look and smell for any signs of leaks. If no leaks are detected leave propane on and turn fridge to gas side if equipped.

If there is the odor or detection of propane leaks please note and shut off.
